

LCTPC Asia/Japan Letter (March 1. 2018)

Aiko Shoji

March 1, 2018

News

- I think the regular meeting on March 22nd will be canceled because of JPS meeting and the season of graduation ceremony.
- It was decided during the LCTPC Collaboration Meeting to have special topical analysis meetings to discuss between groups the results of our R&D tests. Peter and Paul propose to hold monthly meetings, each on a given topic. They propose to start with 'dE/dx resolution and systematics' (on Late March) for which several groups already have new results. Please fill the doodle which was sent by Paul to decide the meeting date.
- 2 new students (SOKENDAI) will join our group (master and doctor).
