## Weekly Report

Content: (1) Bad News
(2) Transmission with correction(Temperature and Pressure)

## Aiko SHOJI

Iwate University

The pole of GEM voltage application of the PC board has been removed，when I picked up GEM．

－I was hard to pick up the GEM，which is bad flaming GEM．
－So，I put to too much strength to pick up the GEM＝＞the pole sounds＂Boki ！！＂

Improvement plan：
－Make a good framing GEM（next time）
－Make sure to pick up the GEM very very carefully
But I succeeded to repair the pole by soldering．

## Bad News という名の反省文 case 2

I scratched GEM by plus driver，when I was turning the screw which GEM voltage application．

## GEM

－The screw did not easily enter the hole ＝＞My hand holding a screwdriver broke the balance．

Improvement plan：
－Make sure to turn the screw very very carefully
－Put a cover to protect on the GEM

I output environmental data for each Run Number using the macro sent by e-mail.
I calculated the electron transmission rate with correction (Temperature and Pressure).

| \#Run | day | $T\left[{ }^{2} \mathrm{C}\right]$ | $\mathrm{T}[\mathrm{K}]$ | AP[hPa] | $\mathrm{P} / \mathrm{T}$ |

Using $y_{0}$ (when Drift length $\mathrm{z}=0$ ) and Charge.C

|  | Gate GEM (w/) | Field Shaper(w/o Gate GEM) | Transmission |
| :---: | :---: | :---: | :---: |
| Non Correction | Charge_Row44 | Charge_Row44 | $\begin{aligned} & \frac{355(G G)}{440(F S)} \\ & =80.8 \% \end{aligned}$ |
| Correction (Temperature \& Pressure) | Charge_Row44 | Charge_Row44 | $\begin{aligned} & \frac{348(G G)}{425(F S)} \\ & =82.4 \% \end{aligned}$ |

Ikematsu Sim: 78 \% Exp: 81\%(Gate GEM Size:10*10cm^2)

Using $y_{0}$ (when Drift length $z=0$ )

|  | Gate GEM (w/) | Field Shaper(w/o Gate GEM) | Transmission |
| :---: | :---: | :---: | :---: |
| Only <br> Temperature Correction | Charge_Row44 | Charge_Row44 | $\begin{aligned} & \frac{357(G G)}{442(F S)} \\ & =80.8 \% \end{aligned}$ |
| Only <br> Pressure Correction | Charge_Row44 | Charge_Row44 | $\begin{aligned} & \frac{350(G G)}{426(F S)} \\ & =82.2 \% \end{aligned}$ |

Pressure seems to influence charge.

- Make a graph of position resolution using GMResol.C .
- Calculate Cd(Diffusion Constant) using PadRes.C
- Simulation Cd using Garfield++

etc....
