

Higgs Working Group Report II

Satoru YAMASHITA
ICEPP, Univ. of Tokyo

What to do in the simulation study

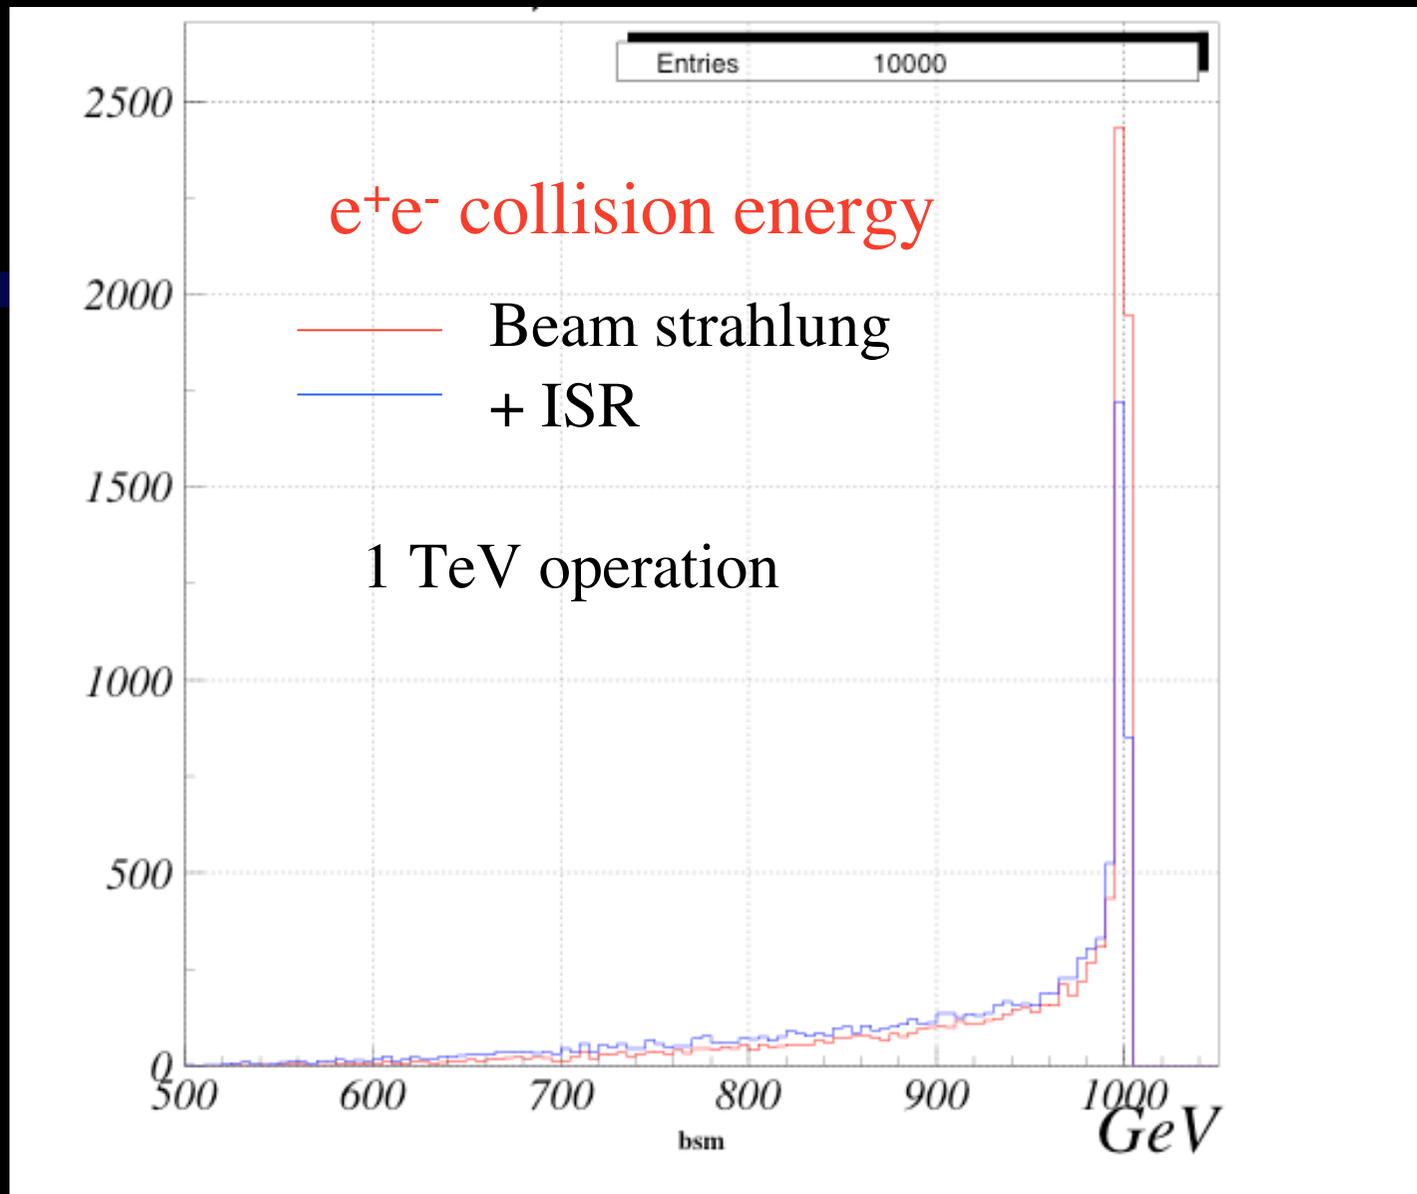

1. Generator Level (BASES+SPRING+PYTHIA)
2. Detector Level (+ smearing, + JSF Qcuick sim, +Full Sim)

What do we have NOW?

1. Tools for Generator (GRACE+Pythia+Beamstrahlung+ISR)
2. Simdst (Quick simulator)
3. Root Files
4. OLD analyses scheme

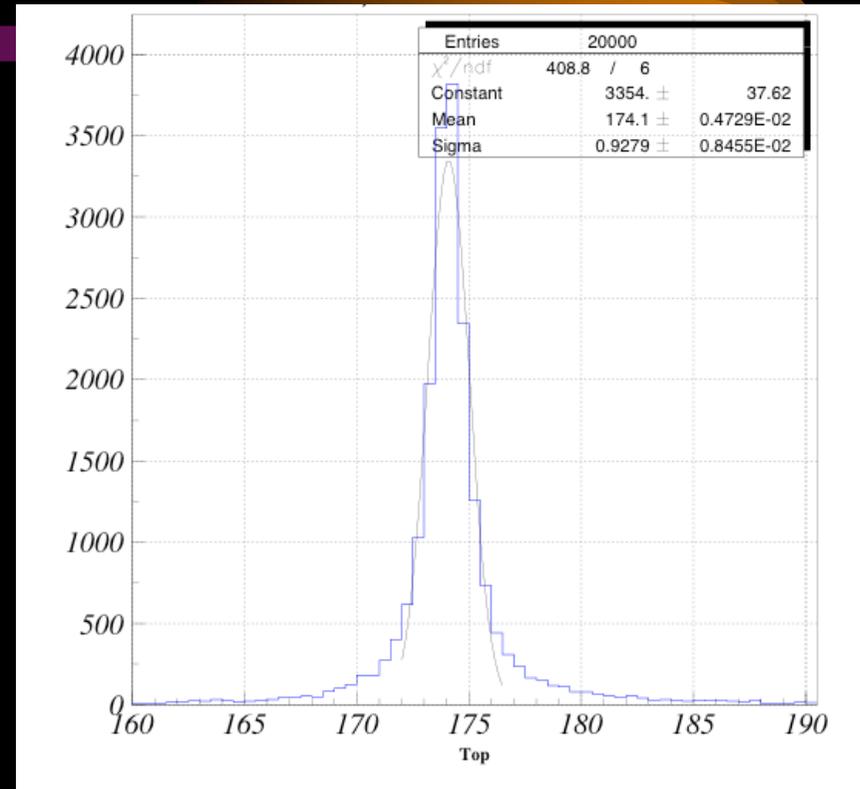

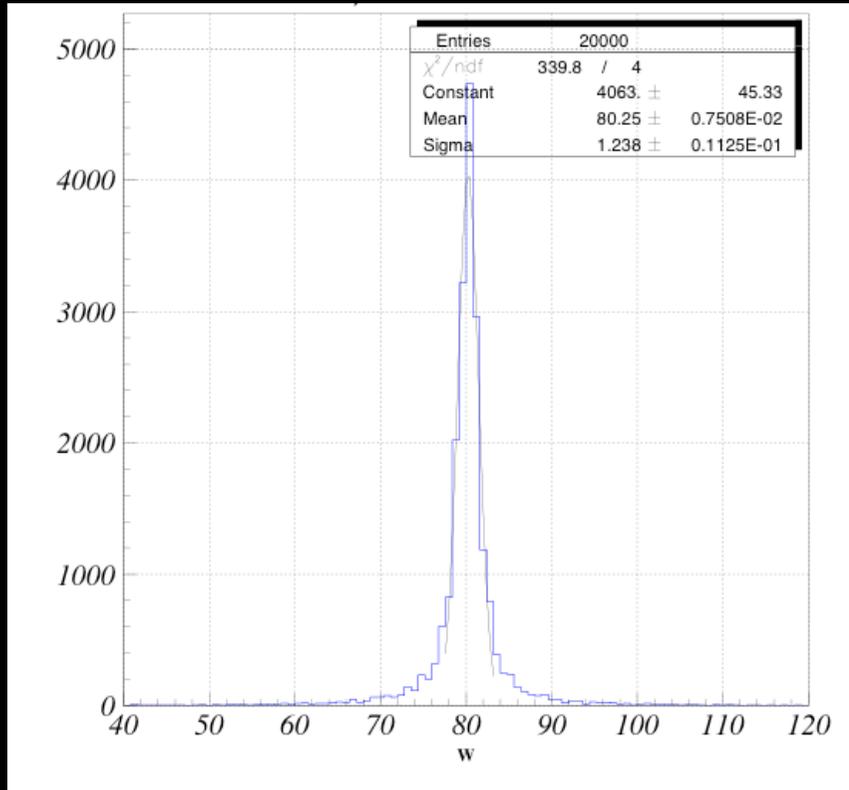

Initial state

Beamstrahlung
ISR photon

t t h Process Generator Level Example

Top --> b + W W --> ff by GRACE

Channels to be analyzed

1. $X + hh$ (multi-Higgs) Highest priority -- Difficult analysis

By ACFA LC : First results (only for $h \rightarrow bb$)

LCWS : updated results

2. SUSY Higgs

AH, H^+H^- should be done -- Simple

By ACFA LC : $A, H \rightarrow bb$, tt may be done

LCWS : update + more decay channels

3. $Zh, \gamma\gamma h$ UPDATE should be done

By ACFA LC : better b/c separation?

better tau tagging

LCWS : Full UPDATE must be done
an example of Full simulation?

Analyses Platform

System: jlclogin.kek.jp
archive: /proj/higgs/data/.... (bases, spring, pythia, simdst, root)
/proj/higgs/anal/.... (analyses soft, TO BE CREATED)

- exist ◎ to come soon ○ to come later (Oct 2003)
- 1. PYTHIA Level platform (Event check, basic property)
 - binary dump
 - ntuple
- 2. Simple Smearing (for making Analyses Strategy and tools)
 - ◎ ntuple
- 3. Quick Simulator output
 - simdst binary dump
 - simdst ntuple
 - Root file

Schedule of Higgs simulation study

2003 spring+summer

- Discussion on *basic strategy*
- Generator arrangement (GRACE+PYTHIA)

2003 Sep ● Generator *bug fix*

Oct ○ Establish Analyses Platform

○ Generator level study

○ **smearing study I**

Nov ○ smearing study II

○ JSF **Quick-sim (simdst)** study

Dec ○ ACFA LC WG meeting (India)

2004 Jan-Mar

○ Analyses Upgrade

Apr ○ LCWS in Paris

Key analyses technique will be

1. Jet finding / jet clustering
2. Jet energy calculation
3. b, c, top, tau tagging
4. W, Z tagging
5. Kinematic constraint fit

All techniques must be UPDATED

WG meeting dedicated for simulation analyses will be held
when the platforms are established (Oct 2003)
