

Minutes of the 22nd "ILC-CLIC e+ studies" meeting

Date: September 15th, 17:00(JST) 10:00(CET), 2011

A part of Attendees (whom Omori was able to hear the voices):
Louis(CERN), Eugene(NSC-KIPT), Norbert(CI), Sabine(DESY),
Andriy(DESY), Friedrich(DESY), Takahashi(Hiroshima),
Kuriki(Hiroshima), Yokoya(KEK), and Omori(KEK)

Agenda:

There was no presentations.

We made discussions about agendas e+ session of Granada meeting and DESY meeting.

(1) About Granada meeting:

LCWS11 will be held on 26-30 September 2011 at Granada Spain.

Positron sessions will be 27, 28, 29th of September. Morning of 27th will be joint session with ILC integration. Full day of 29th will be joint session with CLIC rf and drive beam.

We made discussions about the agenda. Here is a list of the opinions, comments and questions.

- * We need a time to discuss about the plan of the projects in near future. For example, ILC needs discussions to prepare DESY meeting, to prepare TDR, and to decide "who makes what".
- * What is the purpose of the "joint session with CLIC rf and drive beam"? The joint session seems to have very little connection with the e+ source.
- * Can we have WebEx connections in all sessions? Non negligible number of people want to join remotely, so WebEx connection is very desirable.

(2) About DESY meeting.

ILC Baseline Technical Review of Source/RTML/BDS+MDI will be held on 24-27 October at DESY Hamburg.

Positron source session will be on 25th. Electron source session will be on the morning of 26th. Discussion on central region integration will be

on the morning of 27th, it will have some relation
with e+ source.

--

The date of the next phone meeting will be on
October 13th(Thu) 2011; 17:00(JST)/10:00(CET).
