- Please try hard to arrange your trip to be in Tokyo on April 22.

2. Video message campaign:

Omori explained the video message campaign.

LCC is now performing the video message campaign to support ILC project.

As Takahashi-san explained, in order to accelerate movement toward the ILC in Japan, it is crucial to show

- * Scientists presence and enthusiasm to the government;
- * to Politicians, MEXT,,,,.

The campaign is an important part of such efforts.

We would like to ask you to join the campaign.

In the LCWS14 plenary session, LCC Director General Prof. Lyn Evans asked the participants to join the campaign. Please look at the last page of the attached file, "Lyn_Evans.pdf".

Here is a part of the last page;

Recent discussions of possible future circular lepton machines is creating confusion about how much international support there really is. We start an initiative to take audio-visual "witness" from each of you that wants to contribute.

Also please look at the resent issue of LC news line.

A part of video messages are already uploaded in Youtube.

Please make your message. A short message is OK. A 20-seconds message is good. Actually, a shorter message is better.

Please say your name and institute first.

Then, please say,

- ILC is very important in science (no detail reason is necessary),
- and, you want to make your research at/for ILC.

For the method of recording and way to send the video, please look at the LC news line.

Please tell your friends to join the campaign.
