

The POSIPOL international workshop focuses on (polarized) positron sources for future linear colliders but includes discussion of all high-intensity positron sources, x-ray sources, gamma-ray sources, and their applications.

The 10th POSIPOL workshop is to be held at the Cockcroft Institute, UK in 2015

Traditionally, POSIPOL is held in late August or early September each year.

Even if you are unsure that you are going to attend, please consider indicating your preference for the date at <http://doodle.com/wkeetciessd9dsnu4>

The Local Organising Committee is being established. Enquiries in the first instance can be directed to ian.bailey@cockcroft.ac.uk
